Same Powerful System

New Flexible Deployment

Your treasury services bill is the culmination of a very manual, error-prone process – one in which mistakes are inevitable. The only way to identify these billing errors is through monthly analysis of every service item at the detail account level.

With BRMEdge, you can automatically analyze all your bank statements for significant fee reduction. By capturing every transaction and cost parameter, BRMEdge provides you with a comprehensive, transparent view of your treasury operation. Compare service prices across banks and benchmarks to improve bank negotiations, analyze historical volume fluctuations to spot usage trends, even optimize idle balances to maximize returns. Sure, you'll reduce your bank fees, but you'll also gain insights you never thought possible.

BRMEdge SaaS is the same powerful, award-winning system as BRMEdge On-Premise – just deployed differently. Instead of being installed on your company's servers, we host the system on ours. You access BRMEdge over the internet: no need to worry about installation, maintenance, or IT expenses – we'll take care of it.

To learn how BRMEdge SaaS can reduce your bank fees, call The Weiland Financial Group, Inc. today!

Let WFG do the work

- We'll manage the IT environment and all system updates so that you'll always work from the latest & greatest version of BRMEdge without any IT hang-ups, hold-ups, or headaches. We'll even retrieve your electronic statements for you!

Pay for what you use

- With on-demand pricing, your monthly fee will be based on system usage. Plus, the system is scalable so you can add functionality when you need it.

No long-term commitments, no sunk costs

- Our renewable, term subscriptions allow you to get started quickly without any large, upfront costs. When your term's up, automatically renew, renegotiate, or walk away – the choice is yours.

Sleep soundly

- WFG's remote data center is secure, controlled, and SAS 70 Type II certified with multiple back-up layers. Your data is safe with us.

Master your bank fees from Mount Everest

- BRMEdge is the most effective, robust, and versatile bank fee analysis solution available, and through SaaS, you can login from any computer in the world – even from Mount Everest (if you really wanted to).
